

VirtualOffice™

A cloud-hosted, monthly subscription-based, applications-on-demand service providing immediate access to Microsoft Windows virtual desktops and popular applications through an automated provisioning portal.

Sparxent VirtualOffice is a complete end-user Windows 7 desktop experience. The service publishes VDIs, remote hosted desktops, and shared applications. Available applications include the most widely-used business solutions such as Microsoft Office 2010, Microsoft BPOS hosted Exchange, SharePoint, Live Meeting and Office Communicator. The service is priced at \$1,000 per user per year and represents a fully variable cost.

VirtualOffice is built on hardware and infrastructure provided by independent hosting centers from around the world.

Through a unique dynamic provisioning portal, users -- regardless of where they are in the world -- can instantly access applications via Citrix® Receiver. Currently supported environments include Windows, Linux, Mac, iPad, iPhone, iPod Touch, Android phones & tablets, BlackBerry, Windows Mobile, & Java.

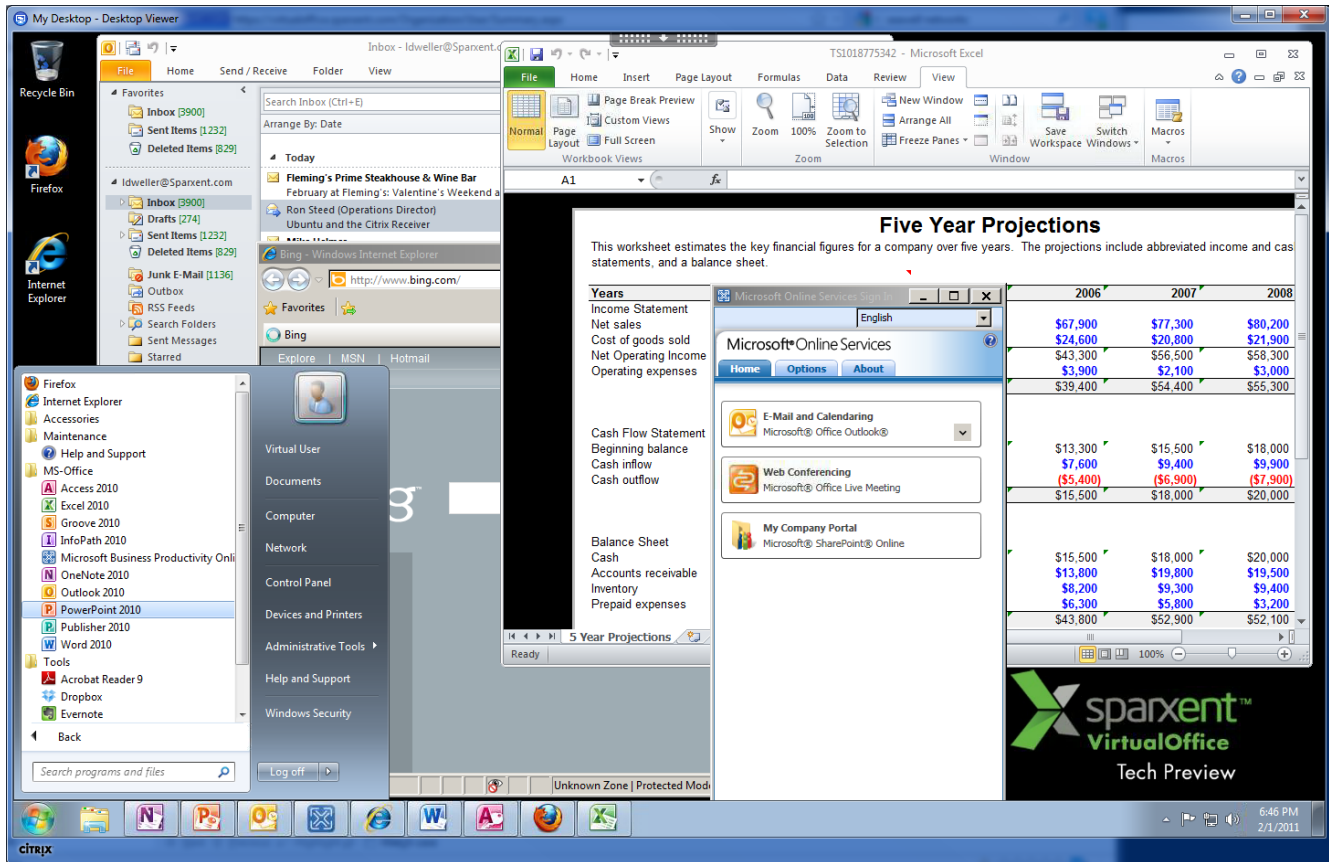

Provisioning subscribers takes less than a minute and users can then select their own applications.

The service is built on core Microsoft business applications and best-in-class virtualization technology from Citrix, including Citrix XenApp, Citrix XenDesktop, Citrix XenServer and Citrix NetScaler VPX.

Benefits

- Provides the most cost-effective, stable, full-functioning hosted Microsoft desktop on the widest possible range of computing devices
- Integrates and automates all application publishing, desktop provisioning, maintenance and security
- Bring Your Own Computer: need for a corporate device is optional
- Users can access the service from anywhere on any device they choose
- Desktops can be shared to reduce operational and administrative costs
- Cloud data storage migration options available for user data, user profiles, and email
- Enhances Security
 - SOX/HIPAA compliance practices;
 - Audit Management
 - ISO 27001 Security Management Compliance

VirtualOffice End User & Portal Administrator Requirements

- Internet Explorer, Firefox, Safari, Chrome, Opera, or other compatible browser

Environment (for additional details see www.citrix.com):

- Windows (XP SP3 or newer)
- Mac OSX (10.5 or newer)
- Linux (various distributions – requires OpenMotif)
- iOS 4.3 (iPad, iPhone, iPod Touch)
- Blackberry (including expected PlayBook mid-2011)
- Android 1.5 (Cupcake or higher)
- Windows Mobile (see Citrix Ready Catalog for devices supported at www.citrix.com/ready)
- Java 10.0 (or higher)
